14. Never use a damaged power cord or plug or tamper with this product circuit.
15. Do not use spare parts not provided by the manufacturer. Be sure to use this product for the purposes described in the instruction manual.
16. Each use time should not exceed 15 minutes (the product will automatically close after 15 minutes). If the use time is too long, the product may overheat and shrink the product life. If the product is overheated, stop using it immediately, then cool the product before proceeding to the next operation.
17. In order to reduce the impact of the impact current on the product, do not switch the power supply frequently in a short time to extend the life of the product.
18. If power outage, the plug should be removed to avoid sudden recovery of power and damage.
19. If you feel abnormal during use of this product, stop using it immediately and consult a doctor.
20. If you have any of the following conditions, please consult your doctor before using this product.

- During pregnancy, during menstruation or shortly after delivery
- Medical electronic devices implanted in the body using a cardiac pacemaker
- Suffering from blood circulation disorders or thrombosis
- Suffering from osteoporosis
- Skin infections
- High fever
- The body has a wound or a surface disease
- Need to recuperate or feel unwell suggested by a doctor
- Persons with physical disabilities, sensory or neurological deficits or lack of experience and common sense (Including children with mental illness, physical paralysis, etc.)
- The surface of the product will be hot during use, and people who are sensitive to heat must pay attention to this point before use.

Warning

In order to avoid dangerous situations such as burns, burns, electric shocks, etc. caused by improper use, please pay attention to the following when using this product:

1. This product is not intended for any medical use.
2. If the product falls into the water, do not put your hand into the water to get the product. Please remove the power plug from the socket first.
3. Do not use this product while bathing or showering. Please keep the product dry and do not operate in a humid environment.
4. Do not place or store the product in any place where it will cause the product to get into the water or other liquids.
5. Do not use spray products or places filled with flammable materials to operate this product.
6. Do not subject this product to strong impact or sharp objects.
7. Do not insert or drop objects into any openings in the product.
8. When there is no one to watch, please unplug the product from the outlet.
9. Do not let children take this product to play.
10. After use and before cleaning the product, please unplug the power plug from the socket.
11. The power cord must be at a safe distance from the heated surface. Do not place the product near fire and flammable areas to avoid malfunction or danger.
12. Do not drag the power cord to move the product, or use the power cord as a grip.
13. When removing the power supply, please confirm that the product is turned off to avoid damage to the product.
